SUBJECT: Toxicological Review of HW05 Data 12 March 2012
Dimock, PA

FROM: Dawn A. Ioven, toxicologist
Technical Support Branch (3HS41)

TO: Rich Fetzer, OSC
Eastern Response Branch (3HS31)

On 26 January 2012, U.S. EPA collected water samples from HW05 in Dimock. The samples were analyzed for over 200 constituents, including volatile organic compounds, semi-volatile compounds, metals and bacteria. The analytical results were then validated and compared to risk-based screening levels and/or standards for public drinking water supplies.

In HW05, no constituents were detected at levels of concern. Based on the data, no unacceptable risk is anticipated from consumption or household use of water from HW05.
